Summary

Seeking internships and hands-on learning opportunities to enhance coding and programming skills.

Education

University of Maryland Baltimore County

Bachelor of Science, Computer Science

Coursework: C++, Python, Data Structures

Expected May 2026

GPA: 3.618

Skills

Languages: Python3, C/C++, Java, HTML/CSS, TypeScript, GO, PostgreSQL, Swift

Technologies: React, NextJS, Firebase, Material-UI, Tailwind CSS

Student Intern | Dogwood Gaming | Spring 2025

- **AI Marketing Tool Development:** Developed an AI Marketing Tool to analyze market trends, identify optimal content strategies, and streamline the marketing process. Pinpoints best influencers, content creators, and posting schedules for maximum engagement.
- Collaborating with cross-functional teams to align technical implementations with strategic goals and user needs.
- Utilizing **Python** and **Go** to develop scalable, efficient backend systems while maintaining focus on performance and usability.
- Utilized **OAuth** for user authentication.
- Built ETL pipelines in Python to ingest and cleanse large-scale social and news data.

Research Assistant | University of Maryland, Baltimore County | 10/2024 – Present

- Assisted the DAMS lab in researching privacy policies for IoT devices.
- Used Python and LLMs to validate triples for Knowledge Graph.

Teaching Fellow | University of Maryland, Baltimore County | 01/2024 – 06/2024

- Assisted students in weekly office hours on Object-Oriented concepts.
- Assisted students with projects that involved memory management using pointers, linked lists, and inheritance.
- Graded bi-weekly C++ projects focusing on memory management, polymorphism, and inheritance.

Projects

Pantry Tracker | Self-Initiated Project | Summer 2024

- A comprehensive full-stack web application that helps users easily manage and track their pantry items.
- Developed with **React** and **TypeScript** for a robust and scalable user experience.
- Styled using Tailwind CSS and Material-UI (MUI) to deliver a clean, responsive design.
- Integrated with **Firebase** for secure and efficient data storage and retrieval.
- Powered by **Next.js** for seamless server-side rendering and optimized performance.
- Integrated OpenAI's ChatGPT to give recipe suggestions.

iOS Movie App Developer | Self-Initiated Project | Summer 2024

- Developed an iOS app that displays a list of movies using a movie database.
- Utilized the **Swift** language to build the app.
- Integrated APIs to fetch and handle real-time data.
- Focused on UI/UX design principles to create an appealing and user-friendly layout.
- Managed project timelines effectively, balancing coding, testing, and debugging to ensure timely delivery.
